Carding Mill Rose Rosa 'Carding Mill'

Height: 4 feet Spread: 3 feet Sunlight: O

Hardiness Zone: 4b

Other Names: English Rose Group/Class: Austin Rose

Description:

A desireable rose with outstanding apricot flowers with a touch of salmon, and butter yellow reverses; intense lovely fragrance; needs full sun and well-drained soil; good disease resistance; provide some protection in colder climates

Ornamental Features

Carding Mill Rose is clothed in stunning fragrant peach flowers with salmon overtones and a buttery yellow reverse at the ends of the branches from late spring to early fall. The flowers are excellent for cutting. It has forest green deciduous foliage. The oval compound leaves do not develop any appreciable fall color.

Landscape Attributes

Carding Mill Rose is a multi-stemmed deciduous shrub with an upright spreading habit of growth. Its average texture blends into the landscape, but can be balanced by one or two finer or coarser trees or shrubs for an effective composition.

This is a high maintenance shrub that will require regular care and upkeep, and is best pruned in late winter once the threat of extreme cold has passed. Gardeners should be aware of the following characteristic(s) that may warrant special consideration;

- Disease
- Spiny

Carding Mill Rose is recommended for the following landscape applications;

info@plants-unlimited.com 207.594.7754

P.O. Box 374 629 Commercial St. Rockport, Maine 04856

- Mass Planting
- Hedges/Screening
- General Garden Use

Planting & Growing

Carding Mill Rose will grow to be about 4 feet tall at maturity, with a spread of 3 feet. It tends to fill out right to the ground and therefore doesn't necessarily require facer plants in front. It grows at a fast rate, and under ideal conditions can be expected to live for approximately 20 years.

This shrub should only be grown in full sunlight. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil type or pH. It is highly tolerant of urban pollution and will even thrive in inner city environments. This particular variety is an interspecific hybrid.
